

A clear monthly envelope for the first release.

Infrastructure assumptions translated into budget decisions for an executive review. Values below are estimates, not measured usage.

✓ Prepared 04 Sep 2026

EXECUTIVE READOUT

Budget the expected production path at **\$20 / month**.

Expected Railway

\$20.00

≈ ₦26,580 / mo

Higher traffic

\$56.50

≈ ₦75,089 / mo

Next decision

Measure, then right-size
after 7–14 days

The \$17 expected usage estimate is below Railway's Pro plan minimum, so the payable monthly minimum is \$20.

STARTING LIMITS

Conservative by default.

Web · single replica

1 vCPU / 1 GB

Database

1 vCPU / 1 GB

Apply limits now. Observe real traffic, memory pressure, and database growth before changing them.

SCENARIO COMPARISON

Three operating envelopes

USD / month · conversion shown for planning only

Minimum practical

Lean baseline

\$8.85 / mo

₦11,762

- Web · 0.35 GB · 0.05 vCPU
- DB · 0.25 GB · 0.03 vCPU
- 5 GB volume · 10 GB egress

Hobby minimum applies

Expected production

Recommended starting point

\$20.00 / mo

₦26,580

- Web · 0.6 GB · 0.1 vCPU
- DB · 0.5 GB · 0.05 vCPU
- 10 GB volume · 30 GB egress

\$17 usage, Pro minimum applies

Higher traffic

Growth stress case

\$56.50 / mo

₦75,089

- Web · 2 replicas × 0.6 GB · 0.125 vCPU
- DB · 1 GB · 0.15 vCPU
- 30 GB volume · 100 GB egress

Usage estimate; no plan floor

Formula: (RAM GB × \$10) + (vCPU × \$20) + (volume GB × \$0.15) + (egress GB × \$0.05), subject to the plan minimum. For replicas, multiply the web resources by replica count.

STORAGE ALTERNATIVE

Cloudflare R2 rates

Storage	10 GB-month free · then \$0.015 / GB-month
Class A operations	1m free · then \$4.50 / million
Class B operations	10m free · then \$0.36 / million
Egress	Free

R2 is the preferred home for uploaded media and other objects that should not consume Railway volume.

GOVERNANCE

Spending controls

- 1 Start on Pro with explicit service limits; review usage after 7–14 days.
- 2 Set a monthly spend alert before production traffic is enabled.
- 3 Keep one owner for Railway billing and one reviewer for monthly variance.
- 4 Right-size from measured usage; do not increase limits preemptively.

⚠ Assumptions & exclusions

- One always-on web service and one database service; no autoscaling assumed.

- Estimates exclude build minutes, backup products, support, taxes, domain, email, observability, and third-party SaaS.
- ₦ figures use an illustrative ₦1,329 / \$ conversion for planning; confirm treasury rate at approval.
- Rates are recorded as of 4 Sep 2026 and should be rechecked before commitment.
